

**I'm not a robot!**

A simple cardboard frame is the perfect way to spice up your room. Use a frame and easy to buy supplies to make your personal picture frame. In that picture frame you can hang upon a few pictures. S U P P L E S: Old frame (size 7x5)- 2 pieces of ribbon - Hot glue gun / glue sticks - Mini clothespins - Newspaper - thumbtacks (- paint if you want to change colour of the frame) The next step is to paint the frame. Later you will glue pieces from newspapers on the frame. But left some holes, so the color can come out. You can choose any color you want. You may also skip this step with painting but I wanted to have a some little holes which are colored. If you have not such a viscous color you must paint the picture with the color several times to have finally an intense color. While the frame is dried, the third step is to tear the newspaper in many stripes which we glue on the frame. The stripes shouldn't be so long, they also could be round. You can choose any form you want. Don't use only one page of newspaper rather a few pages. Pay attention that on the stripes are not always the same font and same color! You can also cut out some big letters/ words, so that they are emphasized on the frame. In the pictures you can see how I cut the different stripes and the several stripes out of newspaper. The next step is to glue the finished stripes out of newspaper on the frame. Work like with a collage so that different stripes from different newspaper pages are next to each other. The pieces can overlap each other. They also can cut each other, so that it all looks a bit messy. If you have big single letters/ words you can glue them on top of the other pieces. So the fonts are emphasized. So left also small holes that the red of the frame can come out. In pictures you can see how I glued the stripes on the frame, they also overlap each other. The other pictures show the back of the frame from different perspectives. To finish the last part of the frame turn the picture frame to the other side. Take the thumbtacks and place them on the front position of the backside of the frame. Make sure that they are well fastened. Be sure the thumbtack take the ribbon and the beginning of the ribbon. Wrap the ribbon around the first thumbtack that take the ribbon and wrap around each other and make several loops. It creates the picture of the different knot. When you are finished take the end of the ribbon and glue decorate the pins to make it more creative. In addition to that if the picture frame has no hanger you can glue with the hot glue gun to fix the other piece of ribbon. So there is the finished product. File Size 16.57 MB Authors Council, Canadian Wood Number of Pages 174 Publisher Canadian Wood Council ISBN 9780921628712 Samples The Canadian Wood Council (CWC) is the national federation of forest products associations responsible for development and communication of technical information about the use of wood products in construction. Ensuring that this information is in tune with technical changes and users' needs is accomplished through the publication and updating of CWC manuals, software, technical bulletins and case studies. v The Engineering Guide for Wood Frame Construction has been produced by CWC to provide guidance to engineers, building designers, building officials, builders, and students of these disciplines, on the structural design of wood elements and connections for wood frame buildings that: (a) fall within the scope of Part 9, "Housing and Small Buildings," of the National Building Code of Canada, and (b) due to the size, location or configuration of the building, engineering design is required in order to augment the prescriptive requirements in Part 9 (See the Foreword for additional explanation).
